FLEXBAR

Designed for hospitality.
Built to move.

Scandinavian mobile bar systems.
Made in Sweden.

Hospitality never stands still. Neither should your space.

FLEXBAR creates mobile and collapsible bar systems for hotels, events, restaurants and hospitality professionals. Designed and manufactured in Sweden, every FLEXBAR combines Scandinavian simplicity with smart functionality and long-lasting quality.

Designed to belong.
Built to move.

Made in Sweden.

Scandinavian by design.
Professional by purpose.

FLEXBAR begins in Gothenburg, Sweden.
Our mobile bars and trolleys are designed and manufactured with a Scandinavian approach to form, function and longevity. Every detail is created around real hospitality — furniture that can be used, moved, adapted and used again.

Built for the moments that keep moving.

WHY FLEXBAR

MADE TO MOVE.

Hospitality changes throughout the day. Your furniture should be able to change with it.

FLEXBAR is designed to move, unfold and be ready when service begins, then fold away when the space needs to change.

30 SEC

Ready in seconds.

MOBILE

Move service where it is needed.

COMPACT

Fold away when the moment is over.

MADE IN SWEDEN

Ships worldwide

HOSPITALITY

DESIGNED AROUND HOSPITALITY.

A FLEXBAR is designed to adapt to the way hospitality works.

From morning service to evening drinks, from hotel lobbies to temporary event spaces, the same system can take on different roles throughout the day.

BAR SERVICE

A professional workstation wherever drinks are served.

BUFFET

Create a flexible breakfast, food or self-service station.

WELCOME

Use the clean counter format for check-in and guest reception.

EVENTS

Move, reconfigure and rebrand for the next occasion.

WHEN HOSPITALITY CHANGES, FLEXBAR CHANGES WITH IT.

Built for the busiest moments.

A full-size professional mobile bar designed around efficient service. Generous workspace when you need it. **Ready in 30 seconds.**

DESIGNED TO SERVE. BUILT TO MOVE.

FLEXBAR Pro 8 is our flagship bar system. A perfect balance of generous workspace, smart functionality and refined Scandinavian design.

Whether at a hotel, event or private venue, Pro 8 delivers a premium bar experience — anywhere you need it.

Designed for professional hospitality, Pro 8 combines a generous working area with a folding construction that makes storage and transport considerably easier.

MAKE IT WORK YOUR WAY.

Choose the accessories that match the way you serve. Configure your Pro 8 for faster service, easier organisation and the demands of your operation.

SERVICE & WORKFLOW

ICE BIN
Keep everything chilled and close.

An integrated ice bin keeps ice, bottles and ingredients within easy reach throughout service.

Available in:
Black · Transparent · Stainless

SPEED RAIL
Keep your essentials within reach.

Quick access to frequently used bottles helps create a faster and more efficient workflow behind the bar.
Available in:
Black · Transparent · Stainless

SINK WITH DRAIN
Add a dedicated sink to your setup.

An integrated stainless-steel sink with drain for convenient rinsing and cleaning directly at the bar.

WATER SYSTEM
Running water.
Wherever you serve.

A self-contained fresh and waste water system makes it possible to use the sink without a permanent water connection.

WORKSPACE & DETAILS

STAINLESS STEEL WORKBENCH
A surface made for service.

A durable stainless-steel work surface designed for intensive professional use and easy cleaning.

SPEED RAIL SIDE HOOK
Add storage where you need it.

A simple mounting solution for positioning a speed rail on the side of the Pro 8 for quick and convenient access.

WIRELESS LED LIGHTING
Light where you need it.

Wireless lighting for both the workspace inside the bar and the front, with no additional cables.

BAR MATS
Surface for preparation.

Helps keep the working area organised while catching spills.

4.7 x 23.6 in
11.8 x 17.7 in

PROTECTION & STORAGE

WHEEL COVERS
Hide the wheels. Keep the look.

Discreet covers conceal the casters when the bar is in position, creating a cleaner, more furniture-like appearance.

PRO 8 COVER
Protect it between services.

A fitted cover that helps protect your Pro 8 from dust and everyday wear during storage.

PRO 8 PADDED COVER
Extra protection in storage & transit.

A padded fitted cover provides additional protection when the Pro 8 is being moved or stored.

Smaller footprint. Same flexibility.

Compact enough for changing spaces.
Capable enough for professional hospitality.
Use it as a bar, buffet or service station —
then move it away when the space
needs to change.

Ready in 30 seconds.

COMPACT. MODULAR. VERSATILE.

Fusion 6 brings the FLEXBAR concept into more compact environments.
Use it independently or combine multiple units when service needs to grow.

WORKING SIDE

Generous when in service. Compact when it's time to move. Fusion 6 folds down to make storage and transport considerably easier.

SERVICE IN MOTION.

Designed to support hospitality wherever service needs to go.

From cooling and preparation to ice, water and storage, the FLOW Collection brings function exactly where it is needed.

MADE TO MOVE.
READY TO SERVE.

ONE SYSTEM. FIVE WAYS TO SERVE.

Five mobile service solutions, each designed around a specific part of hospitality.

From drinks and coffee to refrigeration and clearing, FLEXBAR trolleys bring the same focus on mobility, functionality and Scandinavian design to every part of the experience.

FLOW Service

Service + refrigerated storage.

FLOW Chill

Bar service + refrigeration + ice.

FLOW Ice

Dedicated mobile ice station.

FLOW Double

Maximum refrigerated capacity.

FLOW Spring

Running water, wherever it is needed.

REFRESHMENT STATION

HOSPITALITY, READY WHEN NEEDED.

Bring refreshments directly into the room.

The Flow trolley creates an elegant and flexible refreshment station for boardrooms, meeting spaces, executive lounges and private areas. Keep chilled drinks, glassware and snacks ready for guests without the need for a permanent service point.

READY FOR GUESTS.
FLEXIBLE FOR THE SPACE.

FLOW Service

BUILT AROUND THE WAY YOU WORK.

A versatile mobile service trolley designed to keep chilled drinks, glassware and essentials organised and close at hand.

01 BUILT-IN COOLING

105 L refrigerated storage keeps drinks and ingredients chilled and ready.

02 FOLD-UP WORK SURFACES

Additional workspace when service begins. Compact again when it ends.

03 GLASS RACK STORAGE

Spacious drawers are designed to accommodate standard glass racks.

DETAILS	Dimensions	Weight	Capacity	Temperature	Energy
	W 49.6 D 22.8 H 40.9 in	157 lbs	11.2 fl oz (330 ml) bottles: 56	32°F to 50°F	1.1 kWh / 24 h

SERVICE BAR

A BAR WHEREVER YOU NEED ONE.

Create a point of service wherever the occasion takes you.

Used on its own, the Flow trolley becomes a compact bar for serving wine, beer, soft drinks and refreshments. Easy to position where service is needed, it brings flexibility to lounges, terraces, receptions and smaller events.

COMPACT SERVICE.
READY TO MOVE.

FLOW Chill

EVERYTHING THE BAR NEEDS.

A complete mobile bar station bringing refrigeration, ice and practical storage together in one compact solution.

01 BUILT-IN COOLING

105 L refrigerated storage keeps drinks and ingredients chilled and ready.

02 INTEGRATED ICE BIN

Ice exactly where preparation happens.

03 DRAINAGE STORAGE

Dedicated space below keeps drainage organised and out of the way.

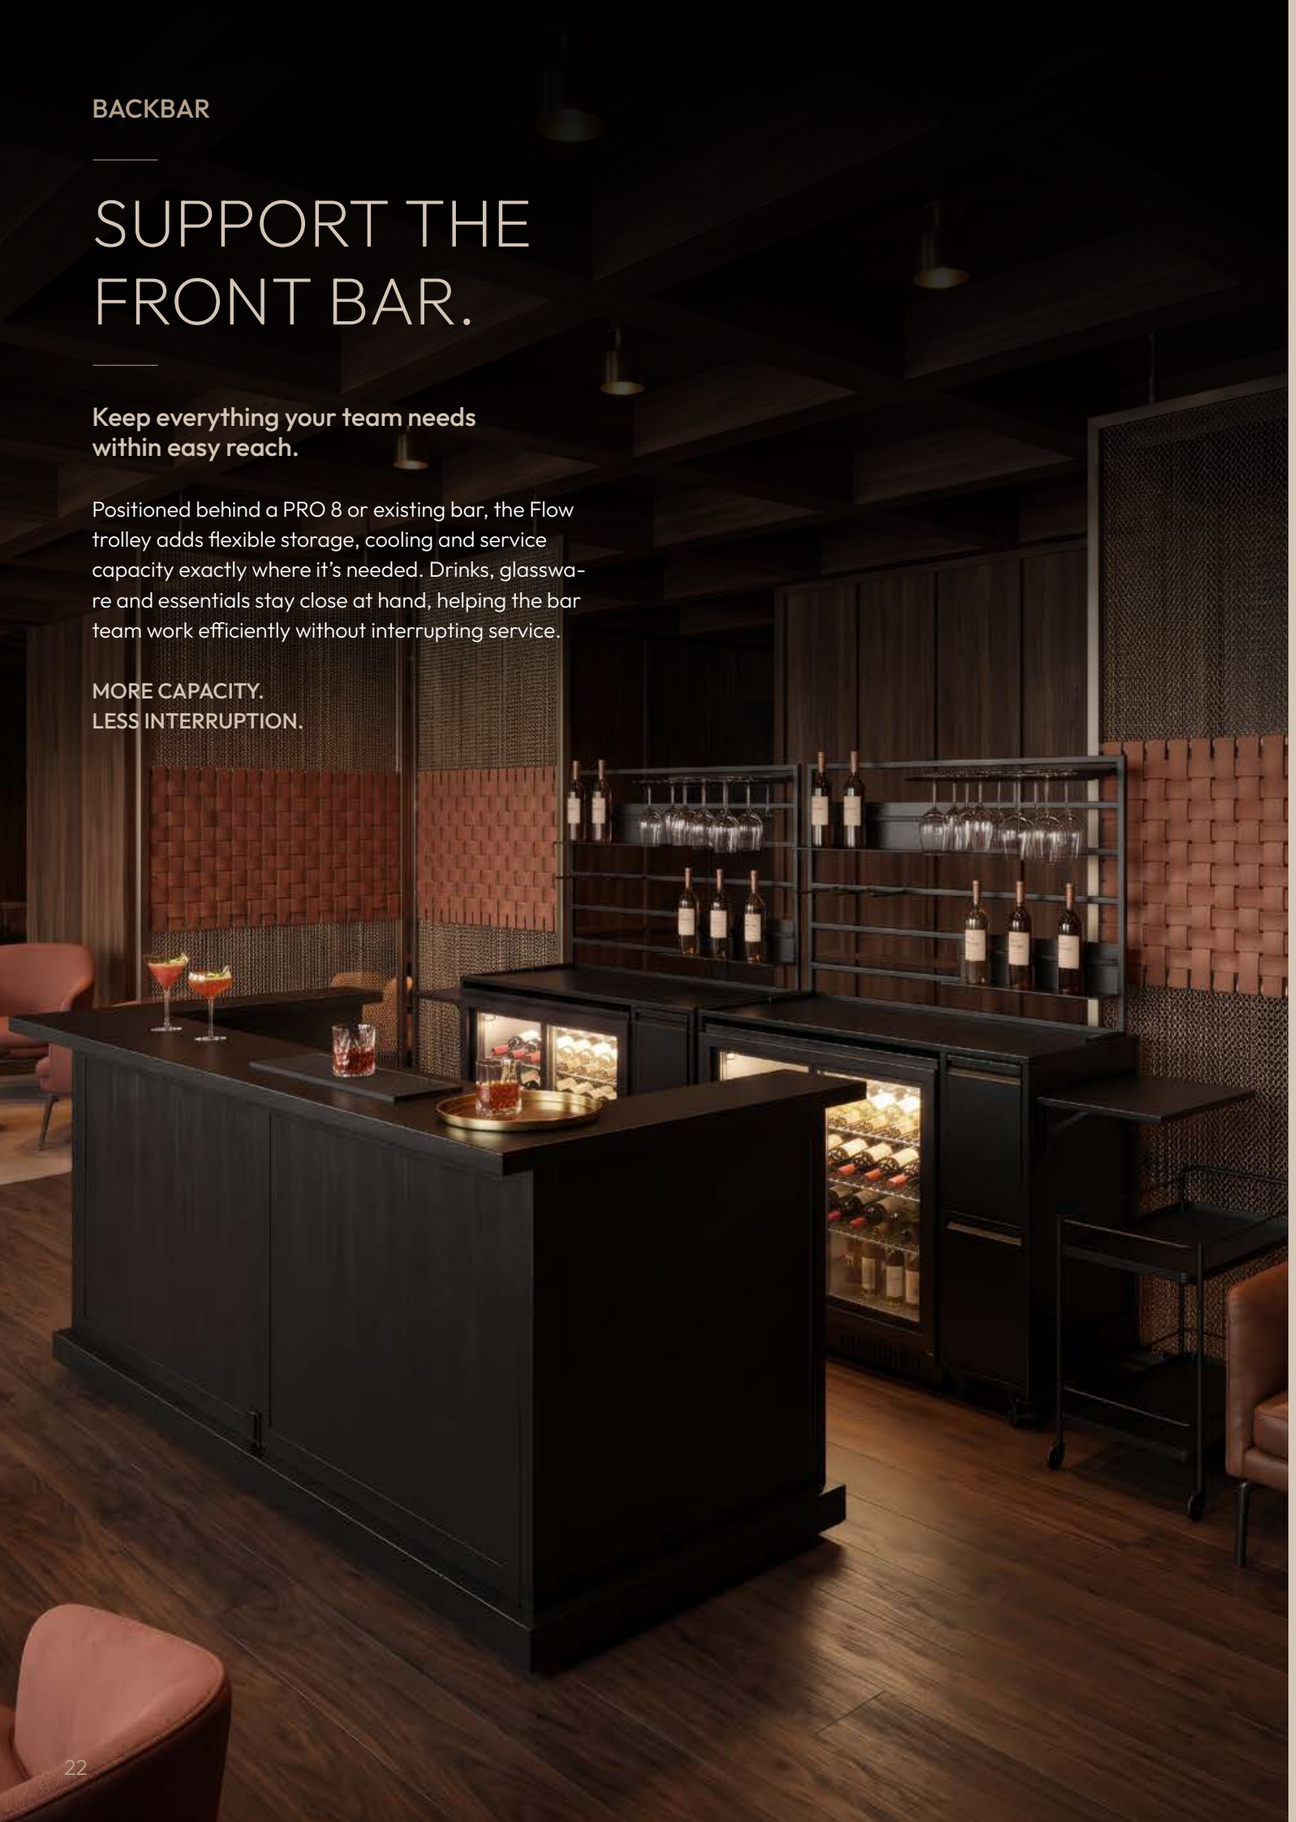
DETAILS	Dimensions	Weight	Capacity	Temperature	Energy
	W 49.6 D 22.8 H 40.9 in	157 lbs	11.2 fl oz (330 ml) bottles: 56	32°F to 50°F	1.1 kWh / 24 h

SUPPORT THE FRONT BAR.

Keep everything your team needs within easy reach.

Positioned behind a PRO 8 or existing bar, the Flow trolley adds flexible storage, cooling and service capacity exactly where it's needed. Drinks, glassware and essentials stay close at hand, helping the bar team work efficiently without interrupting service.

MORE CAPACITY.
LESS INTERRUPTION.



DOUBLE THE COOLING. KEEP SERVICE MOVING.

Designed as the ultimate mobile backbar, Flow Double maximises refrigerated storage while keeping essential supplies close to service.

01 DOUBLE REFRIGERATION

Maximum chilled capacity in a compact footprint.

02 FOLD-UP WORK SURFACES

Additional workspace when service begins. Compact again when it ends.

03 PRACTICAL STORAGE

Two drawers keep everyday service essentials organised.

DETAILS	Dimensions	Weight	Capacity	Temperature	Energy
	W 49.6 D 22.8 H 40.9 in	157 lbs	11.2 fl oz (330 ml) bottles: 98	32°F to 50°F	1.1 kWh / 24 h

WATER STATION

RUNNING WATER. WHEREVER SERVICE GOES.

Bring water service directly to where it's needed.

Flow Spring creates a self-contained mobile water station with an integrated sink, tap and separate fresh and waste water tanks. No fixed water connection or external hoses required. Ideal for temporary bars, event spaces and hospitality environments where running water needs to move with the service.

NO FIXED CONNECTION.
READY TO MOVE.

FLOW Spring

RUNNING WATER. WHERE YOU NEED IT.

A mobile water station that brings an integrated sink and tap directly to temporary and changing environments.

01 — INTEGRATED SINK

A dedicated sink for flexible service.

02 RUNNING WATER

An integrated sink and tap bring running water wherever service needs it.

03 SELF-CONTAINED WATER SYSTEM

Fresh and waste water tanks keep the system fully mobile, with no external hoses or fixed water connection required.

DETAILS	Dimensions	Weight	Capacity	Temperature	Energy
	W 49.6 D 22.8 H 40.9 in	157 lbs	11.2 fl oz (330 ml) bottles: 56	32°F to 50°F	1.1 kWh / 24 h

ICE STATION

KEEP THE ICE CLOSE TO SERVICE.

More ice where the bar needs it most.

Flow Ice brings high-capacity ice storage directly into the service area, keeping large volumes of ice close at hand during busy periods. Use it alongside a main bar, at events or anywhere additional ice capacity is needed, without adding a permanent station.

MORE ICE.
LESS BACK AND FORTH.

FLOW Ice

ICE, READY TO SERVE.

A dedicated mobile ice station designed to keep large volumes of ice close to service.

01 TWO LARGE ICE BINS

Generous capacity for demanding service.

02 FOLD-UP WORK SURFACES

Additional workspace when service begins. Compact again when it ends.

03 EASY DRAINAGE

Dedicated space below keeps drainage organised and out of the way.

DETAILS

Dimensions	Weight	Ice capacity	Work surface	Wheels
W 49.6 D 22.8 H 40.9 in	157 lbs	2x20 US gal	2 fold-outs	4 lockable

ACCESSORIES

MORE WAYS TO SERVE.

Choose the accessories that fit your service.

FLEXBAR

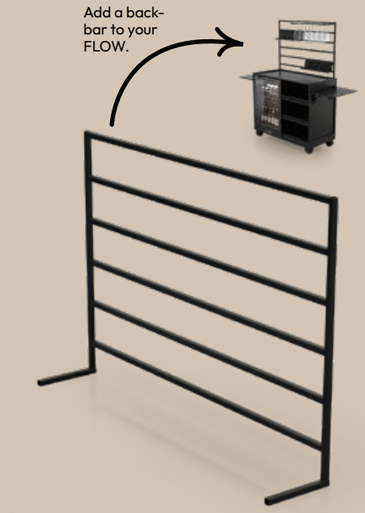
FLOW Accessories

MAKE IT YOURS.

Choose the accessories that fit the way you serve.

Configure your Flow trolley around your space, your service and your needs.

ONE TROLLEY. YOUR CONFIGURATION.



01
BACKBAR RACK

Create a flexible backdrop for service.

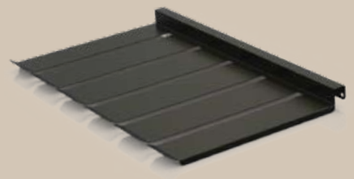
Add glass racks, display shelves and hooks to organise glassware, present beverages and keep selected products visible and within reach.

02
FLOW BAR TOP

Turn your Flow into a serving bar.

Adds an elevated countertop for pre-paring, presenting and serving drinks directly from the trolley.

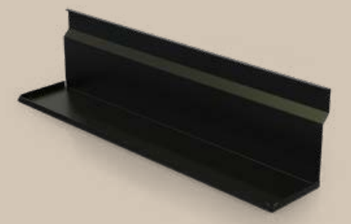
Add hanging display space.



03
GLASS RACKS

Keep glassware ready for service.

Suspended storage keeps stemware organised, protected and within easy reach while freeing up valuable workspace.



04
DISPLAY SHELVES

Put your selection on display.

Use the shelves to present bottles, beverages and other products while keeping them visible and close to service.

05
DISPLAY HOOK

Display more within easy reach.

A simple hanging solution for packaged snacks, confectionery and other products you want to offer or sell.

FLEXBAR

THE PEOPLE BEHIND FLEXBAR

DESIGNED FROM EXPERIENCE.

JOEL SUNDEEN & HENRIK WITH
FLEXBAR

Flexbar was founded in 2019.

Behind it were years of experience, built in different ways and from different perspectives.

Henrik With had spent more than a decade working closely with events and hospitality, designing and building smart, practical solutions for the industry along the way. Mobile bars became a particular focus, giving him a deep understanding of what truly matters in use: functionality, smart construction, easy setup and transport, and making life behind the bar work better.

Built on more than one perspective.

Rachel brought years of experience from the event industry, combined with a strong background in finance and economics. Her understanding of both the operational and financial sides of the business added another important perspective.

Joel Sundeen had co-founded and built an event company from the ground up into one of the leading event companies in the Nordics. Through that journey, he gained extensive experience of the industry, its customers and what it takes to build and grow a business, alongside a strong personal interest in design, products and smart, unconventional solutions.

Experience became a shared ambition.

Their backgrounds overlapped in many ways, while other strengths complemented each other.

In 2019, it all came together around one ambition: to create smart, beautifully designed products for an industry they knew from the inside.

Products born from real experience. Designed to solve real problems in professional hospitality.

That was the beginning of Flexbar.

“

Built on experience. United by one ambition: to create better products for hospitality.

HENRIK WITH, RACHEL NYGÅRD & JOEL SUNDEEN,
The people behind Flexbar

MADE IN SWEDEN

CRAFTED IN GOTHENBURG.

Designed, developed and made with a focus on functionality, durability and detail.

Every FLEXBAR is the result of considered engineering, carefully selected materials and hands-on production.

**BUILT FOR PROFESSIONAL HOSPITALITY.
MADE TO KEEP MOVING.**

FROM MATERIAL TO PRODUCT

Every FLEXBAR starts here. Carefully selected materials, handled and prepared by our team in Gothenburg.

ASSEMBLED BY HAND

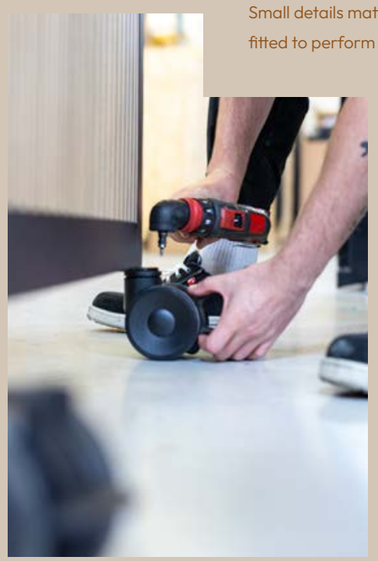
Each bar is carefully assembled by our team, with attention to fit, function and finish.

PRECISION IN EVERY DETAIL

Small details matter. Every component is prepared and fitted to perform reliably, use after use.

PEOPLE BEHIND THE PRODUCT

Experience, collaboration and hands-on craftsmanship are part of every FLEXBAR we make.



MADE TO KEEP MOVING

From hinges to wheels, every detail is designed around mobility, durability and everyday use.

QUALITY CHECKED IN GOTHENBURG

Every FLEXBAR is carefully assembled, inspected and tested by our team before leaving our facility.

**GOOD DESIGN IS IN THE DETAILS.
GOOD PRODUCTS ARE BUILT TO LAST.**

FLEXBAR FLOW: QUESTIONS & ANSWERS

ARE THE FLOW TROLLEYS AVAILABLE IN OTHER POWDER COAT COLOR OPTIONS?
Since the trolley program has just been launched, black matte powder coating is the only option at this time.

WHAT IS THE WEIGHT CAPACITY OF THE DISPLAY SHELF ACCESSORY WHEN MOUNTED ON THE BACKBAR RACK?
The Display Shelves are designed to hold up to 44lbs. of weight.

WHAT IS THE WEIGHT CAPACITY OF THE GLASS RACKS WHEN MOUNTED ON THE BACKBAR RACK?
The racks are designed to support the full number of glasses they can accommodate.

HOW DOES THE WATER FLOW FROM THE FAUCET ON THE SPRING FLOW?
The Spring FLOW uses a rechargeable electric faucet with a built-in pump. It charges via USB-C and can also remain connected to a power source for continuous operation.

IS THE WATER FROM THE SPRING FLOW DRINKABLE?
Yes, the system is designed for use with drinking water.

WHAT IS THE CAPACITY OF THE ICE BIN? HOW MANY LBS OF ICE CAN IT ACCOMMODATE?
The ice bin has a capacity of 32 liters (approximately 8.5 gallons). The actual weight of ice will depend on the type and size of the ice cubes.

THE FLEXBAR FRONT BARS FEATURE MAGNETIC BRANDING OPTIONS. WHAT ABOUT THE FLOW TROLLEYS? WHAT ARE THE DIMENSIONS OF THE FRONT PANEL FOR MAGNETIC BRANDING?
The FLOW Chill, FLOW ICE and FLOW SPRING feature front panels large enough to accept magnetic branding. The front panel measures approximately 48" × 36.6".

ARE THE REFRIGERATION OPTIONS IN THE FLOW TROLLEYS COMMERCIAL GRADE?
Yes. We utilize commercial grade refrigerators that run on North American power, equipped with a 1 year limited warranty. The refrigerator's power cord is about 7' long.

LION'S WOOD HAS RECHARGEABLE BATTERY OPTIONS FOR THEIR PRODUCTS. CAN I INCLUDE RECHARGEABLE BATTERY SOURCES IN THE FLOW TROLLEY IF I DON'T HAVE ACCESS TO A POWER PLUG?
Yes. The FLOW Chill and FLOW Spring have enough interior storage space to accommodate a 1000 watt battery and inverter. You would expect over 5 hours of run time on a single charge.

FLEXBAR: QUESTIONS & ANSWERS

ARE THE CASTERS LOCKING?
Yes. The bar includes 5 locking swivel casters with a foot brake release.

DOES IT SHIP FOLDED?
Yes. The bar ships in a collapsed format that can be rolled off the provided crate ramp.

IS THERE A WEIGHT LIMIT ON THE SHELVES?
Both Flexbar models have two work decks that can support up to 110 lbs. The Flexbar Pro 8 has work decks that can be utilized independently.

WHAT'S THE MATERIAL?
The FlexBar frame is crafted from powder coated aluminum. The counter top, front & side panels, and work deck are constructed from galvanized steel.

IS THE BIN OPENING STANDARD FOOD SIZE?
Yes.

ARE THERE ISSUES WITH SCRATCHING?
Powder coated and galvanized steel may scratch. A great touch up solution would be WD40 to fix up any scratches.

WHAT IS THE TOTAL WEIGHT?
The Flexbar Pro 8 weighs 252 lbs. and the Flexbar Fusion 6 weighs 190 lbs.

DOES IT 'LOCK' IN A FOLDED POSITION?
Yes. There is a locking pin and lanyard that maintains the stored position.

HOW DO I PURCHASE MAGNETS?
Magnets can be ordered at any time directly from Lion's Wood.

CAN THE FLEXBAR BE USED ON ALL TYPES OF FLOORING SURFACES?
The Flexbar is only intended for usage on flat or even surfaces.

IF ONE COUNTER IS UP, IS EVERYTHING STILL STRUCTURALLY SOUND?
Yes. The work decks work independently without compromising any stability.

IS THE LED LIGHTING A STANDARD FEATURE?
LED lights will be available for an extra fee and the purchase will include a set of four light fixtures along with a power bank for charging. The LED charge will last approximately 8 hours of run time.

DOES IT SHIP IN A CRATE?
Yes. Each FlexBar is individually crated and includes a ramp for easy unloading.

HOW DO WE REPLACE SPARE PARTS, IF NEEDED?
Parts will be available at Lion's Wood.

WHEN MY FLEXBAR IS ASSEMBLED, ONE SIDE OF THE COUNTERTOP IS SLIGHTLY RAISED. IS THAT NORMAL?
Yes, a slight lift—usually under a millimeter—is normal and does not affect the bar's integrity or performance.
